PROFILE

Economics graduate specializing in credit risk analysis, financial modeling, and data-driven decision systems. Experienced building Monte Carlo models, risk-adjusted valuation frameworks, and KPI dashboards to support strategic decision-making in manufacturing and enterprise environments.

EDUCATION

Bachelor of Arts in Economics

Clemson University — Clemson, SC | GPA: 3.50/4.00 | Minor: Spanish Studies | Spanish (Fluent) | May 2026

RELEVANT EXPERIENCE

Credit Analyst — Consolidated Electrical Distributors (CED)

Full-Time | Greenville, SC | May 2026 – Present

- Evaluate creditworthiness of commercial accounts across a national electrical distribution portfolio, applying financial ratio analysis and risk assessment to inform credit decisions.
- Manage accounts receivable exposure, monitor aging buckets, and escalate high-risk accounts in alignment with company credit policy.
- Support the credit team in maintaining DSO targets and minimizing bad debt through disciplined underwriting and portfolio monitoring.

Undergraduate Researcher – AI Optimization in Manufacturing

Clemson University in partnership with BMW — Clemson, SC | Fall 2025 – May 2026

- Selected for competitive, interdisciplinary BMW research initiative to build a data valuation and risk governance framework for third-party AI vendor access to proprietary manufacturing operations.
- Partnered directly with BMW's internal risk analyst team to automate a strictly manual vendor screening process, delivering a structured, repeatable scoring framework that reduced reliance on ad-hoc evaluation.
- Developed Monte Carlo simulations and economic models to quantify KPIs around BMW's manufacturing data value, modeling financial exposure and cost-benefit tradeoffs across hundreds of factory variables.
- Built a CIA-weighted risk-scoring model (Confidentiality, Integrity, Availability) to assign vendor security scores and benchmark access risk against defined KPI thresholds.

ADDITIONAL EXPERIENCE

Driver — Daniel Island Club

Charleston, SC | 2023 – Present

- Delivered client-facing service for 200+ members monthly in a high-expectation environment; maintained a 100% accident-free record and trained incoming staff.

Cashier — Publix Super Markets

Charleston, SC | 2017 – 2023

- Progressed through multiple positions over six years, earning increased responsibility for training and onboarding new employees while maintaining consistent accuracy in a fast-paced retail environment.

STUDY ABROAD — SPAIN

Completed upper-level Spanish coursework and traveled extensively across Spain, strengthening professional fluency and cross-cultural communication skills.

TECHNICAL SKILLS

Python, SQL (PostgreSQL), R; Monte Carlo simulation; KPI dashboard development and data visualization (Tableau/Power BI); economic and financial modeling; credit risk analysis; advanced Excel; AI-assisted system design (Cursor AI); Claude Code
